AWARD-WINNING GOODSYNC SYNCHRONIZATION UTILITY
NOW AVAILABLE FOR MAC OS X
*Top-Rated Product Enables Users to Backup/Sync Files Between Any Two Devices,
Locally or Via Web; New Version Makes File Transfers Between Macs and PCs a Breeze*

FAIRFAX, VA — (April 7, 2010) — Siber Systems, Inc., a company dedicated to providing world-class computing productivity software for enterprises and individuals, today announced the release of GoodSync for Mac, the first-ever Mac OS X version of its well-known Windows utility for backing up and synchronizing files between computing devices. The application, able to sync as many as five million files at once, brings new convenience and productivity to both Mac and dual Mac/PC environments at home and at work, and is robust enough for even large enterprises.

GoodSync for Mac supports Mac OS X 10.4, 10.5 and 10.6, and can be downloaded for personal use at www.goodsync.com/mac. GoodSync for Mac Pro, the professional version featuring unlimited jobs and file synchronization plus free Web and toll-free support, is also available for $29.95.

GoodSync is widely regarded as a leading utility for transferring and synchronizing data between any two devices—desktops, laptops, servers, external storage and Windows Mobile devices—in any direction. Winner of numerous awards, GoodSync has been heralded by leading reviewers and publications:

> "GoodSync has brought unbelievable convenience and peace of mind. The software interface is extremely user-friendly and backed up with an easy-to-use manual."—Computer Technology Review

> "We highly recommend this file synchronization tool for all user levels."—CNET Download.com

> "GoodSync is one of the nicest-looking and easiest-to-use of the dozen or so sync programs tested."—PC World

> "GoodSync V7 is fantastic!"—Geek.com

"GoodSync has been popular with Windows users for years—yet many Mac users have been asking for an OS X version. That time has finally come," said William Carey, Vice President of Marketing for Siber Systems. "With cross-platform Mac/Windows environments continuing to grow at home, in schools and in the workplace GoodSync for Mac makes easy file transfer possible regardless of operating system or device."

- more -

With GoodSync, photos, music, videos, even entire hard drives can be backed up and/or synchronized via USB cable, local networks and the Web. It not only can synchronize a user's entire data collection, but also analyzes, filters and displays results of syncing operations, providing confidence that duplicates are avoided and only needed files are synced. Real-time action monitoring, an easy-to-understand tree-based interface, and automatic settings simplify GoodSync's operation, adding to the user's peace of mind.

GoodSync for Mac supports high-speed remote backups via the Web using WebDAV, FTP, FTPS and Amazon S3 protocols. SFTP synchronization will be added in the next two to three months.

GoodSync for Mac is now available for download in both personal and professional versions. To see a full list of features or to download, visit www.goodsync.com.

About Siber Systems:
Founded in 1995, Siber Systems creates and markets software products to consumers and businesses around the world. Our software is highly acclaimed and has received numerous awards including PC Magazine Editor's Choice, CNET's Best Software of the Year, and PC World's 25 Products We Can't Live Without. The company's flagship products, RoboForm and GoodSync, are used by millions of people worldwide, with registered customers in over 100 countries. GoodSync, an easy and reliable automatic file synchronization program, was released in 2006 and already enjoys favorable reviews from users and the press. RoboForm Enterprise has been solving password management problems quickly, easily and cost-effectively since 1999. RoboForm Enterprise reduces employee passwords to one secure, master password and provides an easy and cost-effective way to improve password security while making employees more productive and helping organizations to recognize immediate IT cost savings. As part of the company's strong commitment to customer satisfaction, its software comes with a risk-free trial. Headquartered in Fairfax, Virginia, Siber Systems is privately held.
